

**DeLisa Leighton, Director Strategic Accounts - Hydrogen, Luxfer-GTM**

DeLisa Leighton is the Director of Strategic Accounts for Luxfer-GTM and manages the hydrogen fueling service group. In this role, she built a business practice covering hydrogen bulk fueling, fuel cell preventative maintenance, and disaster response planning to support fuel cells used as backup power by telecommunication carriers within their networks and other industries. In less than three years, over 1,000 fuel cells nationwide are part of the program. She is now expanding the group's services to include innovative initiatives for other hydrogen equipment applications including mobile vehicle refuelers for vehicles and portable hydrogen powered generators and light towers.

Prior to Luxfer-GTM, she was the Program Development Director for the San Francisco-Shanghai Sister City Committee and held management positions in the software industry.

DeLisa is a graduate of UC Berkeley in Asia Studies and Political Science. She serves on the Advisory Board of the Marin County Salvation Army as Vice President and Chair of the Emergency Disaster Response Program.
