

**Roy Bant, Hydrogen Energy Business Development Manager, Northeast, Air Liquide**

Mechanical Engineering, Temple University, 1989.

MBA LaSalle University, International Finance, 1999

For the first ten years of my career, I spent working in the Industrial Gas Industry as a Mechanical Engineer for the sizing and engineering of industrial gas equipment. Systems were complex cryogenic systems, on-site nitrogen plants, and any custom gas system. The late part of my Engineering career was managing projects and building Air Separation plants globally that produce the gases. The second and latest part of my career has been commercial. Outside sales of all products that the industrial gas industry has to offer, then on to Sales Management and having direct reports of sales personnel for 14 years. Since November 2015, I have had the pleasure of working with the fuel cell industry, and vehicle OEM's to promote the utilization of hydrogen for energy or fuel for fork truck, generators, and light vehicles.
